

## CONTENTS

<b>L. L. Jenkovszky:</b> BGL conferences: A brief history .....	5
<b>M. Chodorová, J. Mikeš:</b> A note to $K$ -torse-forming vector fields on compact manifolds with complex structure .....	11
<b>J. Mikeš, I. Hinterleitner, V. Kiosak:</b> On geodesic mappings of affine connection manifolds .....	19
<b>L. Tamássy:</b> Some questions of Finsler- and distance-geometries .....	29
<b>A. Vanžurová:</b> Metrization of linear connections, holonomy groups and holonomy algebras .....	39
<b>N. I. Zhukova:</b> Groups of basic automorphisms of foliations with transverse rigid geometries .....	49
<b>E. Balogh<sup>1</sup>, I. Bartos<sup>2</sup>, I. Lovas<sup>3</sup> and Sz. Márka:</b> Correlations between the quantum fluctuations and the phase of the gravitational waves .....	64
<b>O. N. Golubjeva, A. D. Sukhanov:</b> Some geometrical analogues between the description of the states space in non-classial physics and the events space in classical physics .....	69

<b>A. D. Sukhanov, Yu. P. Rybakov, V. I. Sanyuk:</b> Some geometrical properties of thermal correlated – coherent states .....	82
<b>Z. Tarics:</b> Geometrical model with two exponents for describing the proton-proton scattering at high energies .....	90
<b>A. Altın:</b> The Frenet apparatus of null curve and the null helix in $R_1^{m+2}$	97
<b>Y. Aminov:</b> On isometric immersions of n-dimensional Lobachevsky space into (2n-1)-dimensional Euclidean space .....	104
<b>D. Khots, B. Khots:</b> Non-Euclidean Geometry in Observer's Mathematics .....	112
<b>E. Molnár:</b> Polyhedral space forms with hyperbolic and other metrics ..	120
<b>V. M. Fedorchuk, V. I. Fedorchuk:</b> On non-equivalent functional bases of first-order differential invariants of the non-conjugate subgroups of the Poincaré group $P(1,4)$ .....	122
<b>R. Léandre:</b> Itô-Stratonovitch formula for a four order operator on a torus .....	133
<b>V. V. Dvoeglazov:</b> Lorentz-covariant theories of higher-spin fields and inside .....	138
<b>I. D. Feranchuk , S. I. Feranchuk:</b> Finite charge and mass renormalization in quantum electrodynamics .....	143
<b>G. Krylov:</b> Singular localized states, exactly solvable and quasi-exactly solvable problems in stochastic dynamics .....	151
<b>H. V. Krylova:</b> Secondary quantized problem of pair creation: projection operator technique .....	161
