

Papers

Á. Nagy

2021

1. Á. Nagy: Subspace Theory with Spherically Symmetric Densities, *J. Chem. Phys.* 154 (2021) 074103
<https://doi.org/10.1063/5.0035846>

2020

2. Á. Nagy: Information Theoretical and Thermodynamic View of the Excited-state Density Functional Theory of Coulomb systems, *J. Chem. Phys.* 153 (2020) 154103
<https://doi.org/10.1063/5.0015611>
3. Á. Nagy: Relative Information in Excited-State Orbital-Free DFT Int. *J. Quantum Chem.* (2020)
<https://doi.org/10.1002/qua.26405>
4. Á. Nagy: Spherical Density Functional Theory and Atoms in Molecules, *J. Phys. Chem. A* 124, (2020) 148
<https://doi.org/10.1021/acs.jpca.9b09722>

2019

5. Á. Nagy: Coordinate Scaling in Time-independent Excited-state Density Functional Theory for Coulomb Systems, *Computation*, 7 (2019) 59.
6. L. Y. Tian - H. Levämäki - O. Eriksson - K. Kokko - Á. Nagy -K. Délcég-Cziják - L. Vitos: Density Functional Theory description of the order-disorder transformation in Fe-Ni, *Scientific Reports* 9 (2019) 8172
doi: 10.1038/s41598-019-44506-7 <https://www.nature.com/articles/s41598-019-44506-7>
7. L. Y. Tian - H. Levämäki - M. Kuisma - K. Kokko - Á. Nagy - L. Vitos: Density functional theory description of random Cu-Au alloys, *Phys. Rev. B* 99 (2019)064202
<https://journals.aps.org/prb/abstract/10.1103/PhysRevB.99.064202>

8. J. C. Bolívar - Á. Nagy - E. Romera: Phase-space Fisher information of 2D gapped Dirac materials, *J. Math. Chem.* 57 (2019) 1169
DOI: 10.1007/s10910-019-01015-2
9. Á. Nagy: A thermal orbital-free density functional approach *J. Chem. Phys.* 151 (2019) 014103
DOI: 10.1063/1.5100231

2018

10. Á. Nagy: Density functional theory from spherically symmetric densities, *J. Chem. Phys.* 149 (2018) 204112
DOI: 10.1063/1.5055814
11. P. W. Ayers- M. Levy - Á. Nagy: Time-independent density functional theory for degenerate excited states of Coulomb Systems, *Theor. Chem. Accounts* 137 (2018) 152
DOI: 10.1007/s00214-018-2352-7
<https://link.springer.com/article/10.1007/s00214-018-2352-7>
12. Á. Nagy: Time-dependent pair density from the principle of minimum Fisher information, *J. Mol. Model.* 24 (2018) 234
<https://doi.org/10.1007/s00894-018-3775-8>
13. J. C. Bolívar - N. A. Cordero - Á. Nagy - E. Romera: Fidelity as a marker of topological phase transitions in 2D Dirac materials *Int. J. Quantum Chem.* 118 (2018) e25674 DOI: 10.1002/qua.25674
14. Á. Nagy: Time-dependent pair density functional theory, *Eur. Phys. J. B.* 91 (2018) 110
<https://doi.org/10.1140/epjb/e2018-90082-0>
15. Á. Nagy: Thermodynamical transcription of density functional theory with minimum Fisher information, *Chem. Phys. Lett.* 695 (2018) 149.
<https://doi.org/10.1016/j.cplett.201802.009>
16. J. C. Bolívar - Á. Nagy - E. Romera: Rényi-Fisher entropy product as a marker of topological phase transitions, *Physica A* 498 (2018) 66.
17. H. Levämäki - Á. Nagy - I. Vilja - K. Kokko - L. Vitos: Kullback-Leibler and relative Fisher information as descriptors of locality, *Int. J. Quantum Chem.* 118 (2018) DOI: 10.1002/qua.25557
18. Á. Nagy: Phase Space View of Ensembles of Excited States, *Acta Physico-Chimica Sinica* 34 (2018) 492

2017

19. I. Mayer - I. Pápai - I. Bakó - Á. Nagy: Conceptual problem with calculationg electron densities in finite basis density functional theory, *J. Chem. Theory Comput.* 13 (2017) 3961. DOI: 10.1021/acs.jctc.7b00562
20. B. Godó - Á. Nagy: Fisher information and Rényi entropies in dynamical systems, *Chaos*, 27 (2017) 073104.
<http://dx.doi.org/10.1063/1.4993168>
21. B. Godó - Á. Nagy: Fisher information and topological pressure, *J. Math. Phys.* 58 (2017) 052702.
<http://doi.org/10.1063/1.4983661>
22. Á. Nagy: Thermodynamical transcription of the density functional theory with constant temperature, *Int. J. Quantum Chem.* 117 (2017) DOI: 10.1002/qua.25396
23. Á. Nagy - E. Romera: Link between generalized nonidempotency and complexity measures, *J. Mol. Model.* 23 (2017) 159.
doi: 10.1007/s00894-017-3331-y

2016

24. Á. Nagy - K. Schwarz: Special Issue “50th Anniversary of the Kohn-Sham Theory - Advances in Density Functional Theory” (editorial), *Computation*, 4 (2016) 45
doi:10.3390/computation4040045
25. L. Y. Tian - H. Levämäki - M. Ropo - K. Kokko - Á. Nagy - L. Vitos: Exchange-correlation catastrophe in Cu-Au: A challenge for semilocal density functional application, *Phys. Rev. Lett.* 117 (2016) 066401.DOI: 10.1103/PhysRevLett.117.066401
26. Á. Nagy: Euler equation for descriptors of the Spherically symmetric Coulomb systems, *Int. J. Quantum Chem.* 116 (2016) 862
<http://onlinelibrary.wiley.com/doi/10.1002/qua.25082>
27. Á. Nagy: Advances in DFT (editorial) *Int. J. Quantum Chem.* 116 (2016) 801. DOI: 10.1002/qua.25138
28. Á. Nagy: Phase space view of quantum mechanical systems and Fisher information, *Phys. Lett. A* 380 (2016) 2200-2203
<http://dx.doi.org/10.1016/j.physleta.2016.05.006>

29. B. Godó - Á. Nagy: Fisher information and Rényi dimension: A thermodynamic formalism, *Chaos*, 26 (2016) 083102.
<http://dx.doi.org/10.1063/1.4959908>

2015

30. H. Levämäki - Á. Nagy - K. Kokko - L. Vitos: Alternative to the Kohn-Sham equations: The Pauli potential differential equation, *Phys. Rev. A* 92 (2015) 062502. DOI: 10.1103/PhysRevA.92.062502
31. P. W. Ayers- M. Levy - Á. Nagy: Kohn-Sham Theory for Excited States of Coulomb Systems, *J. Chem. Phys.* 143 (2015) 191101
<http://dx.doi.org/10.1063/1.4934963>
32. B. Godó - Á. Nagy: Detecting regular and chaotic behaviour in the parameter space by generalised statistical complexity measures, *Chaos, Solitons and Fractals*, 78 (2015) 26-32
<http://dx.doi.org/10.1016/j.chaos.2015.07.005>
33. Á. Nagy: Ensemble formalism of the orbital-free density functional theory, Progress In Electromagnetics Research Symposium Proceedings, PIERS Proceedings, 1913 - 1917, July 6-9, Prague, 2015
<http://piers.org/piersproceedings/piers2015PragueProc.php?start=400>
34. Á. Nagy - E. Romera: Relative Rényi entropy and fidelity susceptibility, *Eurphys. Lett.* 109 (2015) 60002.
doi: 10.1209/0295-5075/109/60002
35. Á. Nagy: Density Scaling and Virial Theorem, *Mol. Phys.* 113 (2015)
<http://dx.doi.org/10.1080/00268976.2015.1017017>
36. Á. Nagy: Fisher and Shannon Information in Orbital-Free Density Functional Theory, *Int. J. Quantum Chem.* 115 (2015) 1392 DOI: 10.1002/qua.24812

2014

37. Á. Nagy - E. Romera: Fisher and Shannon information from one-matrix. Link to the kinetic energy, *Chem. Phys. Lett.* 597 (2014) 139-142.
38. E. Romera - M. Calixto -Á. Nagy: Complexity measure and quantum shape-phase transitions in the two-dimensional limit of the vibron model, *J. Mol. Model.* 20 (2014) 2237.

39. Á. Nagy: Local thermodynamical formalism for ensembles of excited states , Indian Journal of Chemistry, 53A, (2014) 965 5-969.pdf
40. Á. Nagy: Excited-state pair-density-functional theory, Phys. Rev. A 90 (2014) 022505.
41. H. Levämäki - Á. Nagy - K. Kokko - L. Vitos: Cusp relation for the Pauli potential, Phys. Rev. A 90 (2014) 062515.

2013

42. Á. Nagy - E. Romera: Quantum phase transitions via density functional theory. Extension to degenerate case, Phys. Rev. A 88 (2013) 042515.
43. E. Romera -Á. Nagy: Density functional fidelity susceptibility and Kullback-Leibler entropy, Phys. Lett. A 377 (2013) 3098
44. Á. Nagy - M. Calixto - E. Romera: A density functional view of quantum phase transitions JCTC 9 (2013)1052
45. Á. Nagy: Theory of Excited States of Finite Systems in Coulomb External Potential, J. Phys. Conf. Series 410 (2013) 012155.
46. B. Godó - Á. Nagy: Characterization of Rössler and Dufing maps with Rényi entropy and generalized complexity measures, J. Phys. Conf. Series 410 (2013) 012090.
47. Á. Nagy: Shannon Entropy Density as a Descriptor of Coulomb Systems, Chem. Phys. Lett. 556 (2013) 355
48. Á. Nagy - E. Romera - S. B. Liu: Local coordinate, wave vector, Fisher and Shannon information in momentum representation, Phys. Lett. A 377 (2013) 286
49. Á. Nagy: Relationship between the effective potentials determining the density and the pair density, Comp. Theor. Chem. 1003 (2013) 97

2012

50. E. Romera - R. del Real - M. Calixto - S. Nagy - Á. Nagy: Rényi entropy of the U(3) vibron model, J. Math. Chem. (2012) DOI 10.1007/s10910-012-0106-7
51. Á. Nagy - E. Romera: Fisher information, Rényi entropy power and quantum phase transition in the Dicke model , Physica A 391 (2012) 3650.

52. M. Calixto - Á. Nagy - I. Paradela - E. Romera: Signatures of quantum fluctuations in the Dicke model by means of Rényi uncertainty, Phys. Rev. A 85 (2012) 053813.
